Reader's Den

SHORT DESCRIPTION:

In today's progressive time, people prefer the internet most. In this covid period, everything shifts online, and everyone would like to rely on online shopping. By thinking about this concept, we imagine that why not people buy books online.

If a customer wants to purchase any books or pdf, he can do it. Before buying any product, he has to sign up. He has to enter his name, email, password, phone number, and address in the sign-up section. Without signing up, viewers can only view this site.

There are bestselling books in the viewer's panel, the latest books, Ekushay bookfair books, and renowned authors. A customer can also enroll in the pdf. Some pdf is also free, and some have to purchase. Customer can also search their desirable books by the book's name and the author's name.

Admin monitor and maintain the whole system. He can update the website with new features and new materials.

HOME PAGE(Customers):

Sign up: Buyers need to register to buy books. Nobody can purchase books from our website without registration, so it is mandatory to note for every buyer. They need to provide some information for safety and give their email, user name, phone number, and, most importantly, home address. Customers have to set their passwords. This password will help them to sign-in in the future. Customers must be sure about their information because they can't change their data without the admin's help next time.

Sign In: Customers have to fill up the username and password section to enter their profile history or dashboard in the sign-in area. Then customers can buy books according to their choice. They can also list their favorite books in their profile.

There will be many more on our home page. There will be some sections like books, genre, author, offer, pdf.

Books option will contain a collection of books. Viewers can see what kind of books we have on our site.

The author option will provide viewers with a great collection of famous authors. Viewers can check their publications by clicking on their pictures.

Genre helps our viewers to check their favorite genre of books. This section will allow them to search in our collection quickly. There will be offer and pdf options too.

Offer option for the books which we will offer. It will be updated daily by admins. In the **pdf** option, there will be some pdf versions of books on our website. Some will be free, and some will be payable.

We will show some **latest collections** of books (ICON) on our home page. Also, some **best-selling books** (Icon) from this decade. Some renowned **authors' pictures** will also be shown on the home page. Viewers can check their (author's) publications too. Viewers can check all updates if the admin panel does some.

ADMIN'S PANEL:

User Information: There will be a list of those who have signed up on the website. Admin will maintain their privacy and will ensure that they can sign-up adequately.

Books Information: In this section, the admin can update the book's price, name, genre, author's name. Admin will also add a new collection of books.

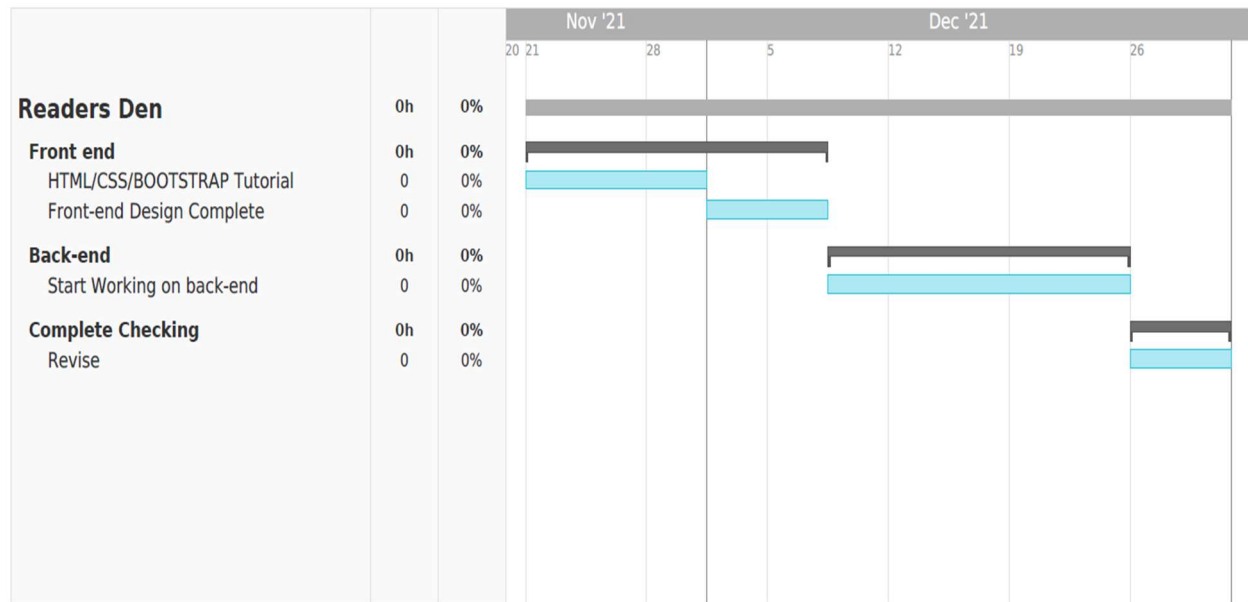

Website Feature: How the website looks, adding new features or removing some features admin will control all these things.

Admin will be the owner of this site, and so they can monitor the complete website information.
